PROFILE

Software developer shipping production mobile, web and backend features with React Native, Next.js, TypeScript and NestJS. Experienced in fintech workflows, authentication, access control, API integration and production releases, with working experience in Python and SQL.

PROFESSIONAL EXPERIENCE

Junior Software Developer Feb 2026 – Present

Nkwa · Buea, Cameroon

- Released improved error handling across five React Native financial flows (Goals, Flip, P2P, Basics and Groups), replacing generic failures with clear recovery states and safer transaction retries.
- Implemented CASL-based role-based access control for Nkwa Pay, connecting predefined permissions to backend APIs for team invitations and member management.
- Owned frontend delivery of internal KYC and transaction-management screens: review, manual resolution, pending-transaction approvals and permission-based controls. Collaborated on financial API integration.
- Shipped a redesigned PIN-reset ID verification flow on mobile with multi-document support, document-specific validation and a feature-flagged rollout.
- Shipped Reserves Anytime Free Withdrawal behind PostHog feature flags and quarterly interest withdrawal, taking the feature through a 14-day controlled pilot to full rollout.
- Delivered NestJS backend changes for transaction audit reasons, payment-error handling, savings streak logic and translated API errors.
- Wrote and optimized SQL queries for Metabase reconciliation dashboards covering seven savings products.

Software Engineering Intern Jul 2025 – Jan 2026

Nkwa · Buea, Cameroon

- Built Nkwa Pay admin portal features in Next.js and TypeScript: merchant KYC review, withdrawals, top-ups and user administration.
- Developed merchant KYC onboarding with document uploads, rejection reasons, tier-aware navigation and English/French localization. Added Cloudflare Turnstile and rate limiting to the contact form.

Machine Learning & Data Science Intern Jul 2024 – Sep 2024

TanglaTec · Remote, Belgium

- Built Python and C++ batch pipelines to detect peaks in experimental voltage measurements, using direct maximum search and Gaussian-based estimation.
- Processed 1,207 of about 1,274 measurement files and isolated the failures for investigation. Handled data cleaning, multi-format loading and 2D/3D plots with SciPy, pandas, Eigen and gnuplot.

SELECTED PROJECTS

RoseAudit · E-commerce and coaching platform

Next.js · TypeScript · Supabase · Cal.com

Built a financial-education storefront with Supabase asset storage and Cal.com scheduling, deployed to Vercel for client review ahead of payment integration.

PneumoScan AI · Pneumonia detection

Python · PyTorch · EfficientNet-B0 · FastAPI · Next.js

Trained a chest X-ray classifier and built the FastAPI inference service and Next.js interface for image upload and prediction review.

MottoFix · Vehicle diagnostics app

React Native · Expo · Node.js · Express · Firebase

Built core routing, camera scanning and image-analysis API integration for a four-person university project, then continued development solo on authentication, settings, tutorials and FAQ screens.

EDUCATION

B.Eng. Computer Engineering 2022 – 2026

University of Buea · Buea, Cameroon

Software Engineering option · Expected graduation: 2026

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, C++, SQL
Frontend & Mobile	React, Next.js, React Native, Expo, Tailwind CSS
Backend	Node.js, NestJS, FastAPI, Express, REST APIs
Data & Tools	PostgreSQL, MySQL, Supabase, Metabase, Git, PostHog, Jest.

AWARDS

2nd Place, Dev War Hackathon · Hustlers Community 2025

Kante Tanyi Tometi Excellence Grant 2023
